

# E4C Group, s.r.o.

se sídlem 28. října 1079/20, Chomutov, PSČ 43001, IČ 26463610, vedená u rejstříkového soudu v Ústí nad Labem

**E4C Group, s.r.o.** is a key business partner of M7 Group S.A., one of the leading providers of satellite services in Europe, with offices in the Czech Republic, Germany and the Netherlands. E4C Group provides support in the area of DVB platforms, specializes in the distribution and contribution of TV products across Europe.

## Job brief

For our Czech team located in Prague we are looking for a (Senior) Network Engineer (full time employment) to develop and maintain functional and secure networks. You will work with a team of engineers to build, optimize and troubleshoot our network dedicated for video distribution/contribution services.

In this role, you should have excellent problem-solving skills and thorough knowledge of network administration and architecture. If you are also passionate about security, data protection and automation, we would like to meet you.

Your goal will be to maintain, develop and support a network that caters to platform needs.

## Responsibilities

- Participation in the continuous development of the TV platform and the associated networks of the M7 Group S.A.
- Project responsibility - assumption of projects implementation as well as active management and project controlling
- System and process documentation
- Ensuring the operational stability of all systems
- Providing 1/2/3rd level support for network environment (participating in on-call rotation)
- Researching, testing, configuring, installing, and maintaining equipment

## Requirements

- Industry-related experience as a Senior Network Engineer or Network Administrator
- Professional certifications (e.g. CCNA, CCNP, CCDP)
- Solid background in network administration, engineering and architecture
- In-depth understanding of communication protocols (mainly TCP/IP) and routing protocols (e.g. OSPF, BGP)
- Familiar with multicast protocols (IGMP, PIM)
- Familiarity with network security and FW management (Cisco ASA)
- Basic knowledge of coding languages and/or automation tools is a plus
- Experience with network diagnostic, monitoring and analysis tools (e.g. LibreNMS, rancid and other network tools)

- Solid understanding of network operating systems (Cisco IOS, IOS-XE)
- Sharp troubleshooting skills
- Experience in Broadcasting environment is a plus
- Ability to work independently and in a team
- BSc/BA in Computer Science, Engineering or a related field
- Very Good English language skills
- Knowledge of Czech or Slovak language and knowledge of specifics of local IP industry

## We offer:

- Friendly job environment
- 5 week of vacation
- Lunch vouchers
- Seminars, trainings, personal development
- Optional personal company car
